

# C++ Operator Precedence

	Operator Precedence	Operator(s)	Operator Group	Group Precedence
1	1	()	used in all groups	first
2	2	unary minus sign that indicates a negative number like -1, -22, etc.	math operators	second
3	3	*, /, %		
4	4	+, -		
5	5	<, <=, >=, >	relational operators	third
6	6	==, !=		
2	7	!	logical operators	fourth
7	8	&&		
8	9			
9	last	=	assignment operator	last

**When you see more than one operator with the same precedence, evaluate Left to Right.**
